

On page 24, line 31, change "can the" to --can be--.

On page 27, line 28, before "first", insert --a--, and after "set", insert --of--.

On page 34, line 32, change "of" to --if--.

Remarks

I. General

Claims 85-125 are pending in the above-identified application. The specification has been amended to correct minor informalities. No new matter has been added.

II. The Examiner's Rejection Under 35 U.S.C. § 112 Should Be Withdrawn

Claim 95 stands rejected under 35 U.S.C. § 112, ¶2 because it is unclear to the Examiner "how display of a cockpit relates to a financial system." Office Action at 2. Applicant respectfully submits that claim 95, as written, is definite.

As explained in the Specification, p. 20, ll. 33-36, a special action indicator 36 can include "a cockpit display where the instruments, as defined by the user, represent financial information and the user's position in the virtual reality world." The characteristic of the special action indicator 36 can be defined via the user interface module. Id. at ll. 26-29. Applicant respectfully submits that claim 95 clearly recites the claimed invention as described above.

Applicant notes that other aspects of the present invention may be misunderstood by the Examiner based on the Examiner's rejection of claims 90-91. For example, the Examiner asserts that the metaphors representing certain features of financial information rotate to "allow[] the user to see the entire metaphor." Office Action at 6.
